-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claims 1-3, Applicant has failed to include in the claims any explicit method step that would constitute an aseptic filling method (i.e. the claims merely include a multiplicity of wherein clauses).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai et al. (JP 05-132041 cited by Applicant).

The Sakai et al. reference discloses a filling method for PET bottles that includes sterilization of bottles at a temperature of between 65-80 degrees C (see paragraph [0005] of translation) and filling of the sterilized bottle at a temperature of less than 40 degrees C (see paragraph [0012] of translation which states less than 40 degrees which at least covers a temperature that falls in the upper part of the range in claim 2).

***Claim Rejections - 35 USC § 103***

Art Unit: 3751

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai et al.

The Sakai et al. reference discloses a sterile filling method (*supra*), but does not disclose an exact filling range of 30 to 40 degrees C (claim 2) or 50 to 60 degrees C (claim 3). It would have been obvious to one of ordinary skill in the art at the time the invention was made to fill beverage at temperatures falling between 30 to 40 degrees C (claim 2) or 50 to 60 degrees C (claim 3), since it has been well settled and held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. See *In re Aller*, 105USPQ 233.
